Specialist Lean management Production and Logistics (m/f)

13.12.2019

In order to support the newly organized Continuous Improvement department at our factory in Kavadarci, we are searching for highly motivated professionals who are ready to face the challenges of the international markets with openness, flexibility and enthusiasm.

As a Specialist Lean management Production and Logistics you will collaborate with cross-functional departments to implement sustainable process improvements, and will act as a champion of continuous improvement throughout the entire manufacturing facility. Projects may be in all areas of the organization including but not limited to Production, Quality, Maintenance, and Logistics. Position will lead the training of Lean principles (5S, Kaizen, Value Stream Mapping, 80/20, Standard Work) as well as Variation Reduction/Six Sigma Green Belt mentorship.

Tasks

- Implementation of optimization projects in the areas of production, logistics and quality in the plant
- Identification and analysis of improvement potential along the entire value chain
- Definition of measures, responsibilities and deadlines for realizing potential for improvement
- Development and coaching of standardized and innovative optimization methods and tools
- Lead workshops for various plant and central functions to identify potential for improvement
- Preparation and presentation of results for the management

Profile

- Completed degree (e.g. industrial engineering, mechanical engineering, computer science, electrical engineering), alternatively comparable academic background
- Experience in production and logistics productions areas
- Experience in the application of optimization methods
- Knowledge of the common lean management tools
- Good English skills, German will be taken as advantage
- Willingness to travel worldwide

The application deadline is **08.01.2020**
